Macgregor Whiting

IT Systems Administrator | Linux and Cloud Infrastructure

mdee-dev.github.io | linkedin.com/in/macgregor-whiting

Professional Summary

IT systems administrator with 5+ years of MSP experience supporting remote users, endpoints, and Microsoft 365. Hands-on background in troubleshooting, identity, patch management, backups, and networking. Builds Linux and virtualization labs to deepen infrastructure administration skills. Microsoft Certified Azure Administrator Associate with a BAS in Information Technology.

Technical Skills

Professional: Windows, macOS, Microsoft 365, Exchange administration, Entra ID, endpoint provisioning, domain joins, RMM patching, off-site backups, VPN support, FortiGate troubleshooting, documentation.

Lab and projects: Linux, Ubuntu Server, Rocky Linux, Proxmox VE, Hyper-V, containers, pfSense, VLANs, DNS, OpenVPN, SSH, systemd, LVM, Bash, Git, basic Python, Azure VMs, Azure Storage.

Professional Experience

IT Systems Administrator | Binary Empires | Remote
December 2020 to Present

- Provide technical support across an environment of 400+ computers and mobile devices, troubleshooting hardware, operating systems, applications, and connectivity.
- Administer Microsoft 365 and user access; provision accounts and hardware and configure Entra joined and Windows domain joined endpoints.
- Manage endpoint patching through RMM software and oversee off-site company backups.
- Configure FortiGate VPN users and clients, troubleshoot blocked websites, and configure pfSense firewalls.
- Manage designated client relationships, document networks, and coordinate technical escalations with external providers.
- Support Microsoft 365 email cutovers and domain migrations, including identity synchronization, authentication, and DNS issues.

Selected Projects

- Segmented home lab: Built Proxmox virtual machines and containers, pfSense VLAN separation, filtered DNS, OpenVPN with two-factor authentication, and a Windows Server domain.
- Azure administration lab: Deployed virtual machines, storage accounts, and identity configurations to practice administration aligned with AZ-104.
- Heritage Vault 2.0 academic design: Planned a Linux architecture using FreeIPA, Kerberos, Firewalld, role-based access control, identity-aware proxies, and LVM.

Education and Certification

Bachelor of Applied Science in Information Technology | Ensign College | October 2026
Associate of Applied Science in Information Technology | Ensign College | April 2026
Microsoft Certified: Azure Administrator Associate | AZ-104 | April 2026
System Administration Certificate | Ensign College | June 2026
